Professional Summary

Computer Science Engineering student with strong fundamentals in Java, Object-Oriented Programming, and full-stack development. Experienced in building real-time web applications using React and RESTful backend services with databases. Quick learner with strong problem-solving skills and eager to contribute to the engineering environment.

Education

KL UNIVERSITY | Hyderabad, Telangana | Expected Graduation: June 2027

- Bachelor of Technology in Computer Science Engineering with Honours (GPA: 9.64/10)

Certifications

- **AWS Certified Cloud Practitioner** - Foundational knowledge of cloud concepts, AWS core services, security, pricing, and architecture. - [link](#)
- **Operating Systems (NPTEL)** - Completed course covering process, memory, and file system. - [link](#)
- **Software Engineer Certification (HackerRank)**: Software engineering fundamentals and problem-solving. - [link](#)
- **MongoDB Associate Developer**: MongoDB fundamentals, CRUD, and data modeling. - [link](#)
- **Microsoft Azure AI Engineer Associate** – Azure AI services & ML solutions. – [link](#)

Technical Skills

- **Languages**: Java, C, Python, JavaScript
- **Full Stack Development**: Java, Spring Boot, RESTful APIs, Node.js, React.js, HTML, CSS
- **Databases**: MySQL, MongoDB, PostgreSQL
- **Tools**: Git, GitHub, Postman, Linux, Bash, Docker
- **Core Strengths**: Java, Object-Oriented Programming, Data Structures & Algorithms, Backend Fundamentals, REST API's
- **Soft Skills**: Problem-solving, communication, teamwork, leadership, adaptability

Projects

CoreDB (Lightweight Database Engine) - Java - [Repo](#)

Custom-built file-based relational database engine supporting SQL-like commands and persistent storage.

Custom Data Structures Framework - Java, OOP, Algorithms – [Repo](#)

Built a custom Java collections framework by implementing Arrays, Dynamic Lists, Stacks, Queues, HashMap, HashSet, TreeMap, and TreeSet from scratch without using java.util.

Huffman Compression-Decompression - Java, Algorithms - [Repo](#)

Java-based CLI tool for lossless file compression using Huffman coding with efficient bit-level processing.

CodeManager - React, Spring Boot, MongoDB, Docker - [Repo](#)

Competitive programming dashboard with profile analytics, contest tracking, and an online compiler.

EduStealth & Hidden Chat - MERN, WebSockets - [Repo](#)

Educational platform with an encrypted hidden real-time chat system and stealth access mechanism.

Coding Profiles & Problem Solving

- **CodeChef**: 800+ problems solved, 100+ contests (Gold Problem Solver badge)
- **LeetCode**: 280+ problems solved across core DSA topics
- Applied data structures and algorithms to build real-world systems and backend applications
